SUMMARY

Creative, curious, software engineer with a deep interest in web technologies. Proven track record of creating and implementing successful front-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100Devs, Los Angeles, CA

Jan 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured full stack web applications.
- Wrote API's on the client-side and server-side using Node and Express.

Freelance Web Developer | Oxnard, CA

Jan 2021 — Present

- Created front-end web apps and static websites for different small businesses.
- Updated landing pages using HTML, CSS, and JavaScript.
- Consulted on SEO and social media strategy.

Sales clerk at Republic National Distributing Company, Ventura, CA

Oct 2013 — March 2020

- Contributed to the local branch's 10% annual growth in sales.
- Organized in-store wine tastings and events with sponsored brands.
- Managed store inventory and marketing displays.
- Built and developed close customer relationships.
